

Pozdravni govor predsednika Udruženja kardiologa Srbije

Srce i krvni sudovi 2015; 34(3): 67

Welcome letter of the President of the Cardiology society of Serbia

Poštovani članovi Udruženja kardiologa Srbije,

XX jubilarni kongres Udruženja kardiologa Srbije održaće se od 29. oktobra do 1. novembra 2015. godine u hotelu "Palisad" na Zlatiboru. Pre 2 godine imali smo i XIX kongres UKS na ovom mestu a ja imam obavezu kao Predsednik UKS da Vas upoznam sa najvažnijim aktivnostima u prethodne 2 godine.

Posle pauze od 2 godine obnovljen je BASICS+ sastanak (Beogradski samit interventnih kardiologa), i 2014. godine je održan osmi a 2015. godine deveti BASICS+ u organizaciji Radne grupe za interventnu kardiologiju i UKS. Te 2014. godine je u Srbiji prvi put implantirana veštačka aortna valvula perkutanom pristupom (TAVI) i implantacija okludera aurikule leve pretkomore. Po prvi put je u organizaciji UKS oktobra 2014. godine organizovana konferencija o najnovijim preporukama Evropskog udruženja kardiologa "Praktični aspekti implantacije ESC preporuka u Srbiji 2014. godine" (PEPS 2014). Svoje prvo predstavljanje imala je i Radna grupa za kardiovaskularni imidžing UKS organizovanjem veoma uspešnog Prvog kongresa kardiovaskularnog imidžinga u Srbiji marta 2015. godine. Na ESC kongresu 2015. godine u Londonu, UKS je prvi put imalo 2 samostalne sesije. Septembra 2015. je pod pokroviteljstvom UKS održan kurs prof. H. Wellensa: "What you should know about ECG in 2015?" Takođe, septembra 2015. godine je održan II međunarodni SAFA kongres o tromboprolaksi u atrijalnoj fibrilaciji u organizaciji Udruženja za atrijalnu fibrilaciju Srbije i UKS. Udruženje je imalo svoje aktivnosti i u mnogim drugim stručnim sastancima Radnih grupa i Podružnica Srpskog lekarskog društva.

Udruženje kardiologa Srbije je tokom dvogodišnjeg perioda imalo redovne aktivnosti koje su objavljivane na internet sajtu UKS www.uksr.org. Sajt UKS je imao veliki poseta mesečno i to je znak da je zaživeo među članovima Udruženja. Časopis UKS "Srce i krvni sudovi" je izlazio tromesečno i svi brojevi su dostupni na sajtu Udruženja. Tokom aprila 2015. godine izabrani su budući predsednici svih radnih grupa za period 2017-2019.

I na kraju, između dva kongresa UKS je imalo izuzetno dobru saradnju sa drugim nacionalnim udruženjima, kako regionalnim, tako i međunarodnim. Verovatno najznačajnije je formiranje Ogranka American College of Cardiology za Udruženja kardiologa Srbije i Udruženja kardiologa Republike Srbije.

Poštovani članovi Udruženja kardiologa Srbije, poštovani gosti i prijatelji Udruženja, želim Vam uspešan, edukativan i interesantan kongres kao i prijatan boravak na Zlatiboru.

S poštovanjem
Predsednik Udruženja kardiologa Srbije
Prof dr Zoran Perišić, FESC, FACC

Dear members of the Cardiology Society of Serbia,

It is my pleasure to inform you that XX Jubilee Congress of the Cardiology Society of Serbia will be held from October 29 to November 1, 2015 at the hotel Palisad on Zlatibor Mountain. Two years ago we organized XIX Congress of the Cardiology Society of Serbia in this place and it is my duty, as the president of the Cardiology Society of Serbia, to present to you the most important activities for the past two years.

After a break of two years BASICS+ (Belgrade Summit of Interventional Cardiologists plus) was renewed and in 2014 and 2015 we held the Eighth BASICS+ and the Ninth BASICS+ respectively, organized by the Working Group for Interventional Cardiology and Cardiology Society of Serbia. In 2014, the implantation of artificial aortic valve by percutaneous approach (TAVI) was performed for the first time in Serbia as well as the implantation of the left atrial appendage occluder. For the first time, in October 2014 the Conference on the latest recommendations of the European Society of Cardiology (ESC) – Practical Aspects of Implementation of ESC Guidelines in Serbia 2014 (PEPS 2014) was organized by Cardiology Society of Serbia.

The Working Group on Cardiovascular Imaging of the Cardiology Society of Serbia had its first presentation by organizing very successful First Congress of Cardiovascular Imaging in Serbia in March 2015. In 2015, at the European Society of Cardiology Congress in London, Cardiology Society of Serbia had two separate sessions for the first time. In September 2015, under the auspices of Cardiology Society of Serbia, Prof. Hein Wellens held the course: What you should know about the ECG in 2015? Also, in September 2015, Second International SAFA Congress on Thromboprophylaxis in Atrial Fibrillation was organized by Serbian Atrial Fibrillation Society and Cardiology Society of Serbia. Our Society also had its activities in the work of many other professional meetings of the working groups and Serbian Medical Society subsidiaries.

During the two-year period Cardiology Society of Serbia had regular activities that were published on the Internet site www.uksr.org. The official website of the Cardiology Society of Serbia has a great number of visits every month and this is a sign that the members of the Society got accustomed to it. The Journal of the Cardiology Society of Serbia - Heart and Blood Vessels was published quarterly and all issues have been available on the website. During April 2015 all the future presidents of the working groups for the period 2017-2019 were elected.

And finally, between two congresses, Cardiology Society of Serbia had a very good cooperation with other national associations, as well as with regional and international ones. Probably the most important is the establishing of the American College of Cardiology International Chapter of Cardiology Society of Serbia and Cardiology Society of the Republic of Srpska.

Dear members of the Cardiology Society of Serbia, dear guest and friends of the Society, I wish you a successful, educational and interesting Congress and a pleasant stay on Zlatibor.

Respectfully,
Zoran Perisic, MD, PhD, FESC, FACC
President of the Cardiology Society of Serbia
