

Znati, misliti, sanjati. To je sve.
Viktor Igo

Savoir, penser, rêver. C'est tout.
Victor Hugo

Poštovane kolegice i kolege,

Dragi prijatelji,

Želim da vam poželim dobrodošlicu na XXII Kongres Udruženja kardiologa Srbije i da vam se zahvalim na učešću i trudu koji ste uložili da bi naš Kongres bio upravo ovakav: sastanak na kome ćemo čuti najsavremenije stavove u kardiologiji, gde će eksperti u svojim oblastima izložiti svoja iskustva, gde će istraživači podeliti sa nama svoja saznanja, gde ćemo razmeniti mišljenja i gde ćemo se družiti.

Želim da se zahvalim Ministarstvu zdravlja Republike Srbije i Srpskoj akademiji nauka i umetnosti, i njenom Medicinskom odeljenju na pokroviteljstvu.

Zahvaljujem se farmaceutskim kućama koje su kao i uvek podržale naš najveći i najvažniji strukovni Kongres i koje su uvek otvorene za nove ideje i još bolju saradnju.

Ove godine pored gostiju iz inostranstva sa nama su i naše drage kolege iz regiona sa kojima želimo da ostvarimo još bolju saradnju i zajedničke akcije.

Prethodne dve godine su brzo prošle i nadam se da smo zajedno sa rukovodstvom Udruženja opravdali vaše poverenje i doprineli njegovoj daljoj afirmaciji, ugledu i razvoju. Tokom ove dve godine nastavili smo aktivnost koje su bile usmerene ka edukaciji, organizaciji stručnih sastanaka u okviru Udruženja, promociji i prevodu Evropskih preporuka, stipendiranju mladih kolega za odlazak na stručne sastanke. Na našem sajtu uksrb.rs sada možete da pristupite predavanjima vodećih stručnjaka koji su bili naši gosti, možete da nađete kliničke kalkulatore, prevode preporuka i da se obavestite o svim stručnim dešavanjima kod nas i u regionu.

Posebno smo ponosni na novoformirane fondove podrške za stručno usavršavanje kojima ćemo moći da pružimo finansijsku podršku kolegama koji žele da odu na usavršavanje i da ovladaju novim metodama koje će kasnije implementirati u našoj zemlji, formiranje Foruma žena u kardiologiji, pokretanje novog sastanka Radne grupe za elektrofiziologiju, ponovno prihvatanje nagrade Doc. dr Aleksandar Popović koji promovise naučno-istraživački rad, nagrade najboljim abstraktima poslatim na ovaj kongres, kao i specijalnog priznanja u formi Povelje UKS koja želi da se zahvali našim kolegama koji nisu kardiolozi a koji su svojoj profesionalnu karijeru posvetili kardiovaskularnim bolestima kroz kliničku praksu, edukaciju i naučno-istraživački rad.

Udruženje je učestvovalo u promovisanju preventivnih mera putem obeležavanja Svetskog dana srca pod pokroviteljstvom Svetske zdravstvene organizacije i Svetske federacije za srce, koje su usmerene ka edukaciji stanovništva i podizanju svesti o značaju primarne i sekundarne prevencije kardiovaskularnih bolesti.

Naše Udruženje neguje najbliže odnose se Evropskim kardiološkim društvom, sledi i promovise njihove aktivnosti, i ponosno je na sve naše članove koji aktivno učestvuju u njegovom radu i rukovođenju! Izražavam posebnu zahvalnost predsednici ESC prof. Barbari Casadei koja po drugi put dolazi na naš kongres i koja je naš iskren prijatelj. Baš zahvaljujući Prof. Casadei, naša zemlja je u prvoj liniji zemalja koja se uključila u novi strateški projekat ESC – EuroHeart, koji za cilj ima unapređenje i podizanje na potpuno novi nivo kvaliteta kontrole zdravstvene usluge. Proces implementacije EuroHeart projekta započinje 2020. godine sa akutnim koronarnim sindromom i perkutanom koronarnim intervencijama, i naše udruženje će uraditi sve da bude što ranije uključeno u njenu realizaciju u našoj zemlji!

I za kraj, kao kruna naše aktivnosti i htenja, ponosni smo što možemo da najavimo knjigu Kardiologija: Klinički vodič, prvu knjigu Udruženja kardiologa Srbije, kao rezultat rada i angažovanja vodećih stručnjaka iz naše zemlje, nastavnika i saradnika sa svih Univerziteta u Srbiji sa ciljem da na klinički praktičan način predstavi znanja iz savremene kardiologije.

Koristim ovu priliku da se zahvalim svim ljudima sa kojima sam saradivala, koji su mi pružali podršku, korisne ideje i konstruktivne kritike, koji su promovisali Udruženje na najbolji način i u svim delovima Srbije, a posebno se zahvaljujem članovima Upravnog Odbora i mojim najbližim saradnicima koji su omogućili da se sve ideje sprovedu u delo.

Hvala i želim vam uspešan Kongres
Predsednica Udruženja kardiologa Srbije
Prof. dr Ana Đorđević Dikić

Respected colleagues,
Dear friends,

I want to welcome you to the 22nd Congress of the Cardiology Society of Serbia and to thank you for the participation and the effort that you have invested in order for our Congress to be what it is today: a meeting point where we get to hear about the most recent findings within the field of cardiology, where experts in their respective areas get to present their experience, where researchers share with us their results, where we get to exchange opinions and socialise.

I want to express gratitude to the Ministry of Health of the Republic of Serbia and to the Serbian Academy of Sciences and Arts and its medical department, for their support.

In addition to that, I would also like to thank the pharmaceutical companies which have, as always, supported our greatest and most important professional Congress and which remain open to new ideas and even better further cooperation.

This year, aside from the guests from abroad, we also have with us our dear regional colleagues with whom we want to have an even better cooperation and mutual activities.

The last couple of years have gone by fast and I hope that both I and the Executive Board of the Society have lived up to your expectations and that we have contributed to its further affirmation, reputation and development. During these two years we have carried forward with the activities which were directed towards education, organisation of expert meetings within the Society, promotion and translation of the European guidelines, and providing grants for our young colleagues so that they could attend ESC meetings. You can now access the lectures of leading experts who have been our guests on our website uksrb.rs where you can also find clinical calculators, translations of the guidelines, and information about all professional events both in Serbia and abroad.

We are particularly proud of the newly established grants for the support of professional development which will enable us to provide financial support for our colleagues who want to go abroad to further their education and learn about new methods that they will later implement here in our country; for the forming of the Women's Cardiological Forum; for starting a new meeting of the Working group for electrophysiology; for the re-establishment of the Dr Aleksandar Popovic Award which promotes scientific research; and for the awards for the best abstracts sent to this Congress as well as a special acknowledgment to our colleagues which gratitude is expressed towards all of our colleagues who are not cardiologists, but who have dedicated their careers to cardio-vascular disease through their clinical practice, education and research.

The Society has promoted prevention by marking the World Heart Day with the support of the World Health Organisation and the World Heart Federation, which both target the education of the general population and the raising of awareness about the importance of both primary and secondary prevention of cardiovascular disease.

Our Society maintains close ties with the European Society of Cardiology; it follows and promotes their activities and it is proud of all its members who have actively participated in its work and management. I want to express special gratitude to the president of the ESC, prof Barbara Casadei who is attending our Congress for the second time and who is and has been a sincere friend of ours. It was thanks to her that our country is one of the first who have been included into the new ESC strategical project EuroHeart which aims to promote and raise the level of quality within the area of health care. The implementation process of the EuroHeart project will begin in 2020 with the acute coronary syndrome and percutaneous coronary interventions, and our Society will do all in its power to be included in its realisation in our country.

Finally, as the peak of our activities and good will, we are proud to be able to announce the publication of the book Cardiology: A Clinical Guide, the first book by the Cardiology Society of Serbia as a fruit of labour of the leading experts from our country (teachers and associates from all universities in Serbia) with the goal to present the knowledge from contemporary cardiology in a clinically practical way.

I want to use this opportunity to thank all of the people that I have cooperated with, who have given me support, useful ideas and constructive criticism and who have promoted the Society in the best possible way in all parts of Serbia. I would particularly like to thank the members of the Board and my closest associates who have made it possible to translate all of our ideas into practice.

Thank you and I wish you all a successful Congress.
The President of the Cardiology Society of Serbia
Prof. dr Ana Đorđević Dikić
